

ReconMed

Automated Medicine Reconciliation

Reconciled before the visit.

A voice agent calls trial participants, resolves what they say against the protocol, and hands a coordinator a reviewed draft.

HackMIT 2026

32.8%

of Phase III participants have a protocol deviation

Tufts CSDD · 187 protocols

\$4,862

per data error, when it is found in retrospective review

I-SPY COVID · Comms Medicine 2025

45.5%

of calls to participants surface a medication issue

Martinez et al., 25,829 calls
