

The model is not the source of truth

Left alone, it invents drugs — and invents words nobody said.

AP News

AI transcription tool used in hospitals invents things no one ever said

“hyperactivated antibiotics” — a drug that does not exist, invented in a patient’s notes.

26 Oct 2024

STAT

Watson recommended “unsafe and incorrect” cancer treatments

recommended a drug that could cause severe or fatal bleeding — for a patient already bleeding.

25 Jul 2018

Science

AI transcription tools “hallucinate”, too

made up whole sentences in about 1.4% of the transcriptions tested.

26 Apr 2024

Hallucination is a property to design around, not a bug to patch.

as reported by AP News, STAT and Science
